Professional Summary

Technical Team Lead and Senior Full-stack Engineer with 20+ years of experience shipping products across FE / BE / DevOps as well as building, leading, and mentoring teams. I specialise in broad domain knowledge, legacy modernisation, reproducible tooling and environments, and CI/CD that boost release frequency and reliability.

Common stacks: TypeScript / Node.js / React / Svelte, PostgreSQL, Docker, Nix, AWS / Azure / GCP.

Skills

Programming Languages: JavaScript, TypeScript, Python, SQL.
Front-end: Svelte, React, Next.js, CSS / SASS / Tailwind, Semantic HTML.
Back-end: Node.js (Express / Restify), REST, OpenAPI / Swagger.
DevOps / Platform: Nix, Terraform, Ansible, Chef, Docker, Bitbucket Pipelines, GitHub Actions, Vercel, Tailscale.
Cloud / Data: PostgreSQL, AWS, Google Cloud Platform, Segment, Matillion, Snowflake.
Linux: 26 years of server and desktop experience, including Debian / Ubuntu, Red Hat / CentOS, Alpine, Arch, NixOS, etc.
Practices: Infrastructure as Code (IaC), Functional Programming (FP), Microservices, CI/CD, Developer Experience (DX), TDD / Code Review, Mentoring / Team Leadership.

Work Experience

DevOps Lead, Infrastructure Engineer — Nov 2025 – ongoing
Anasound — *Denmark, remote*

Project-based Contract Work for National Safety Service Provider

- Architected entire infrastructure and security policies, with single-source-of-truth deployment, including for the employee onboarding program and internal communication channels; including bespoke replacements for AWS services that would otherwise cost hundreds of dollars per month.
- Engineered custom Terraform integrations for services without existing support, including life-cycle management, and user role and policy verifications.

Tech: Terraform, AWS, Google Workspace, Docker, Nix, Node.js, Python, PHP, Tailscale, Wireguard

Senior Software Engineer and Team Lead — Aug 2024 – Apr 2025
Space Cow Media and Undisclosed Medical Startup — *USA, remote*

Project-based Contract Work for Trading Platform and Medical Assistance AI Tooling

- Redesigned payment system architecture for modern libraries and APIs, streamlined data structures, and implemented resilience / fallback mechanisms for card trading transactions.
- Implemented Nix-based development environment and CI pipeline, establishing declarative reproducibility and improving deployment reliability across multi-month project timeline.
- Led a team of 5 junior developers to build an LLM-assisted medical records tool, reducing post-appointment administrative work by 10–15 minutes per visit, while managing Azure CI/CD pipeline and deployment platform.

Tech: Node.js, Python, Flask, FastAPI, React, Vue, CSS3, Emotion, PayPal, PostgreSQL, Azure, Docker, Nix

Senior Software Engineer — Apr 2023 – Jun 2024
Enginable — *USA, remote*

Agentic AI and LLM Services

- Architected and developed a Generative UI + MCP-style platform that made it possible to develop Proof-of-Concept demos in just hours, from previously taking weeks (before Vercel's v0 and Anthropic's MCP were published).
- Developed a replacement for over 250 thousand lines of technical debt that worked as guardrails for an LLM, enabling 3 non-technical employees to visually design interaction flows for passenger handling at a major airport in the United States.

Tech: TypeScript, Svelte, Tailwind, Clerk, pnpm, Python, Flask, Docker, Nix, Vercel, OpenAI API, Claude API

Technical Team Lead May 2022 – Dec 2022
Contractbook *Denmark, remote*

Contract Management Platform

- Led a cross-functional team of 6–7 engineers to deliver 3 major features in 2 months by restructuring rituals, documentation, and ownership.
- Optimized CI/CD pipeline to cut deploy times from >3h to <30m, increasing release frequency and lowering change failure rate.
- Standardized local dev environments and coding practices, lifting developer-experience scores from lowest to top-tier within the org.
- Aligned scope and acceptance criteria with Product / Design, reducing rework and accelerating cycle time.

Tech: Elixir, TypeScript, React, Redux, ProseMirror, PostgreSQL, Docker, GitHub Actions, Google Cloud Platform

Senior Software Engineer Jun 2021 – May 2022
Portchain *Denmark, remote*

Planning and Scheduling Software for Shipping Terminals and Carriers

- Refactored thousands of lines into a handful of modular packages and modernised 30–50 React components with FP principles and modern web standards, eliminating copy-paste patterns and improving performance.
- Led documentation and knowledge-sharing initiative, standardising coding styles and establishing a shared engineering wiki.

Tech: TypeScript, fp-ts / io-ts, Node.js, Next.js, React, Redux, PostgreSQL, Socket.io, Docker, Heroku, Segment

Technical Architect and Engineer / CTO Apr 2017 – Jan 2021
TrainAway *Denmark, remote*

Fitness Booking App and Service

- Designed and implemented scalable back-end and front-end architecture in 2 months, supporting tens of thousands of monthly users and scaling comfortably to 10x capacity without code changes.
- Built and managed team of 3-7 junior developers over 3 years, mentoring one developer into a lead role ahead of COVID-19-related restructuring.
- Led B2C to B2B pivot over several months, expanding customer base and integrating multi-country gym management systems.
- Established data warehouse pipeline with analytics integration supporting 1,500+ gym partnerships and user engagement tracking.

Tech: Node.js, PostgreSQL, Redis, OpenAPI, React, Docker, Nginx, Socket.io, Ansible, AWS, Snowflake, Matillion

Open Source Projects

Vineyard: Desktop integration layer for Wine. Independently developed, then selected by Canonical and integrated into the standard Ubuntu desktop environment in collaboration with their team.
LinReaper: Wine-based wrapper for the Reaper DAW. Deployed in several professional sound studios worldwide.
GryPhon CD-Player & CeeMedia: First themeable GTK2 CD player with hardware-access Python library for CD playback; CeeMedia film catalog used at transmediale Berlin festival.

Education

Technical School of Copenhagen Copenhagen, Denmark
Mediaproduction (Web-integrator) *Certified 2011*

Copenhagen Production School (program later moved to the Royal Danish Academy of Music) Copenhagen, Denmark
Bachelor's Degree in Audio Engineering / Tonmeister *Graduated 2003*
